

The public comment period has now closed for the draft environmental assessment (EA) regarding the construction of a seasonal sea lamprey barrier in Alger County, Michigan.

We are reviewing the public and agency comments received, and all comments and our responses will be included in an appendix to the Final EA. In addition, we will make revisions to the Final EA to address substantive comments and provide further clarification.

When revisions to the EA are completed, they will be posted on the project website and we will share a link to the document with you.

Thank you for your participation in the review process,

Pete
